About this guide

At Cullybackey College our motto is 'creating opportunities for success'. Young people today are measured on their performances and grades across a host of subjects, so it is important that we help to support our students to achieve their very best.

We want our students to get into the good habits of working hard and preparing thoroughly for exams from an early age. We want them to experiment with different revision techniques and we want them to realise the importance that revision plays in making sure that they achieve the result that they are capable of and the result that they can be proud of.

This short guide gives a little bit of help and support as you plan for the exams that will be taking place between Mon 1st to Thurs 4th December 2025.

Don't forget that the grades you achieve are a direct result of the amount of effort, time and work that you put in.

All the very best for your exams,

Mr T Manson

Vice Principal

Getting ready for the exams . . .

Exams are not meant to be easy – they are designed to be something that will test your knowledge and understanding across the different subjects that you study.

Here are a few tips that might help . . . .

1. **Study environment:** try to find a quiet, peaceful place where you can work. Turn off the TV, the music and your computers and digital devices
2. **Know what you are meant to learn**: make sure that you know what you have been studying, that all missing notes have been copied up and that you know what might be coming up in the exam
3. **Take notes of your notes:** it is not enough to just sit with your book open to read – you need to rework your notes and try to remember the key points – why not . . .
    a. reduce your notes down to sentences or key words
    b. colour code your revision with highlighters
    c. create a mindmap
    d. turn your notes into pictures
4. **Memorise**: you need to get your subject notes into your head!
    - Use your hand to cover and check what you can remember
    - Use Post its – put a question on one side and the answer on the other side
    - Make posters for your bedroom with the key things you need to remember
    - Test yourself – ask a friend or parent to ask you questions.
5. **During the exam:** Close your eyes, take a deep breath . . .
    - Read every question carefully. Underline the key words in the question.
    - Show what you know!
6. **Stay fit and healthy:** During exams make sure that you drink enough

Art

Year 8 – Observational Drawing

As you know you will be given the task of drawing your shoe for your exam. You will have practiced this in class with your teacher in order to help you with some of the more tricky aspects of drawing from life.

In order to prepare for your exam you should:

- Choose the shoe you are intending to bring with you to draw in your exam (if you are forgetful opt for your school shoe as you won't forget this on the day!)
- Practice drawing the shoe, you will be working on A3 size paper in your exam, remember this is twice the size of your normal A4 paper.
- Follow the instructions below to ensure you are not missing any vital elements of the drawing.

1. Set your shoe on the table so that you can clearly see it.
2. Think about the angle of the shoe, can you see inside it? How much?
3. Think about how much of the top of the shoe is the opening, a third? A half? Draw this first.
4. Draw the line from the opening down the front of the shoe to the toe, ignore any laces or buckles for now.
5. Draw the toe and heel, check carefully, are the edges rounded or sharp?
6. Draw on the heel and the sole of the shoe, you should now have an outline for your shoe and be ready to add detail.
7. Add any laces, buckles etc. Details like stitching are also important. When drawing laces notice how the laces sit over the top of the shoe, avoid stiff and straight lines as fabric bends!
8. Look for highlights and shadow, you are ready to add tone (shading).
9. Check if the shoe casts a shadow on the table, add this in.
10. If you are finished and have some time left produce a detailed close up study of a section of a shoe on a blank part of the page.

Included are a few images which might also help with your revision. If using a non – uniform shoe please remember to bring it with you!
